After a 25-year career in the Electric Utility / Internet Service Provider industry, I am seeking a position that will maximize my skills and experience in Information Technology. My personal desire is to remain in my life-long hometown of Scottsboro, Alabama so that my family may continue our lives near our friends and family.

Education:

June 11, 1999 - Bachelors of Science, Business Administration
Management Information Systems
Auburn University

May 28, 1993 - Scottsboro High School

Experience:

June 28, 1999 - Scottsboro Electric Power Board

- Telecommunications Technician, Network Administrator

March, 2015 - Scottsboro Electric Power Board

- IT Manager

Professional Synopsis:

My 25-year career at Scottsboro Electric Power Board has given me the opportunity to work in virtually all areas of Information Technology. From installing broadband connectivity in customers' homes and businesses to being the sole person responsible for designing, configuring, implementing and maintaining multiple corporate and service provider networks, I have had the opportunity to leverage my education and abilities utilizing networking components from Adtran, Arris, Ciena, Cisco and Juniper to build and maintain reliable fiber optic voice, video and data networks with five-nines-plus availability. Aside from networking, my responsibilities have included configuring and maintaining both Open Source and Windows Active Directory servers and workstations. I also have extensive experience dealing with multiple vendors, customers and co-workers on a daily basis, providing assistance as necessary to ensure their needs and expectations are met in a prompt, timely fashion.
